## What is Zoiper Thunderbird add-on?

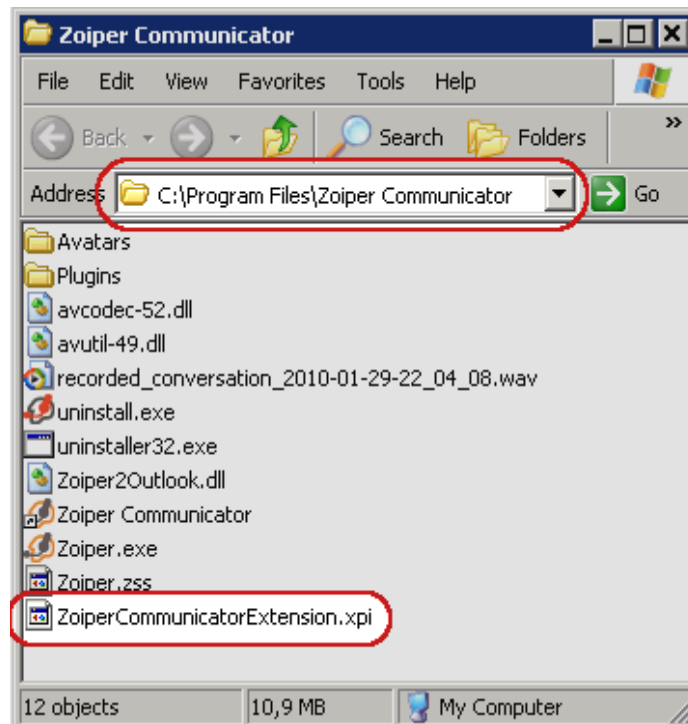

This add-on enables you to dial the contacts stored in the address-book of your Thunderbird mail reader via Zoiper Communicator Biz. It works on *Linux* and *Windows*.

*Zoiper Thunderbird add-on is available only for the Biz versions of Zoiper.*

## How to obtain Zoiper Thunderbird add-on?

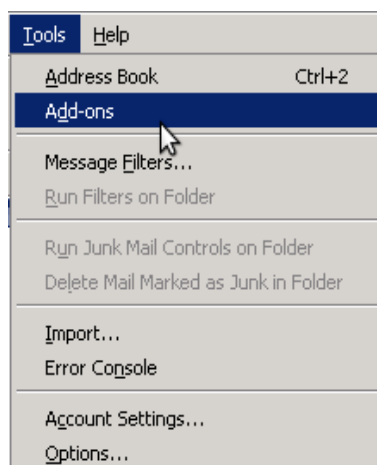

It is included in the installer.

Install your Zoiper communicator Biz. Open the directory where Zoiper is installed.

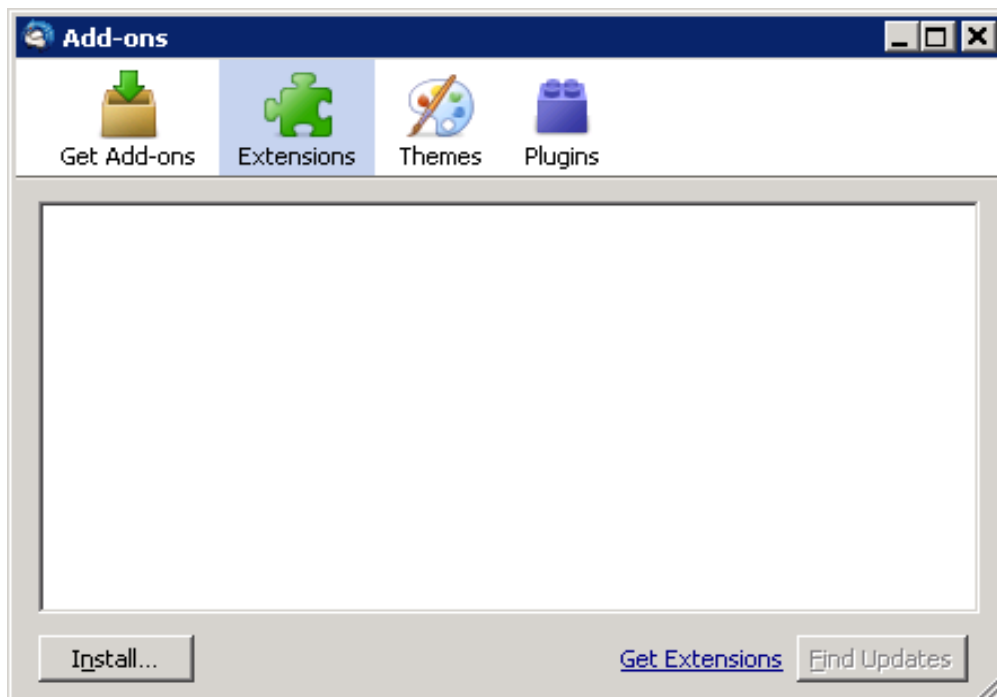

## How to install Zoiper Thunderbird add-on ?

Open your **Thunderbird** mail client. Go to the "**Tools**" menu and choose "**Add-ons**".

You will see a new window. It shows all the add-ons and themes that are already installed.

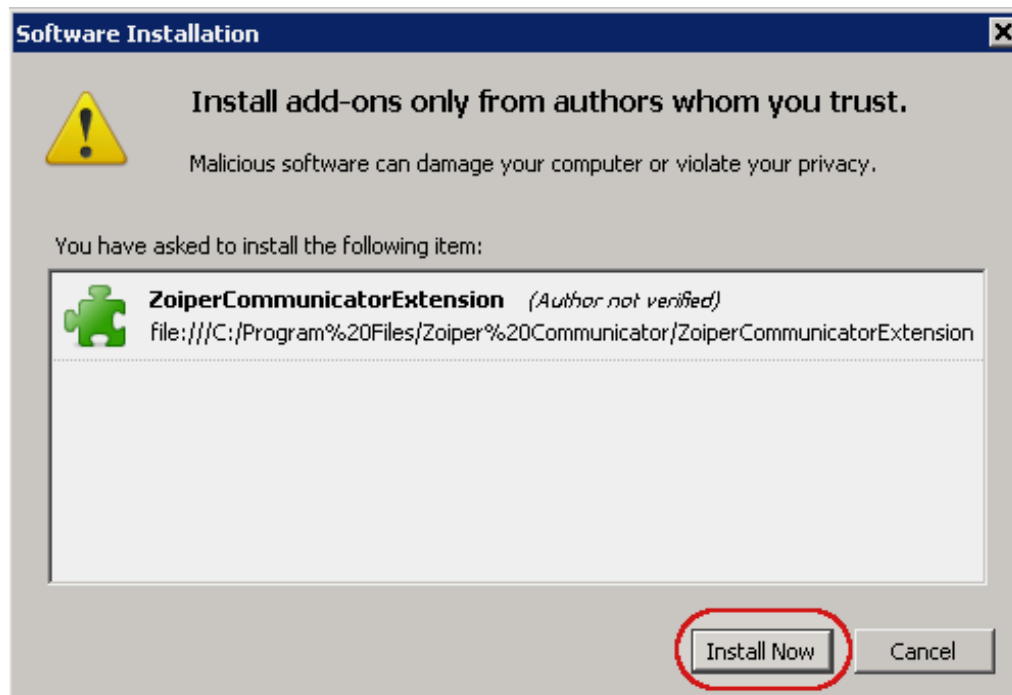

Now click . 

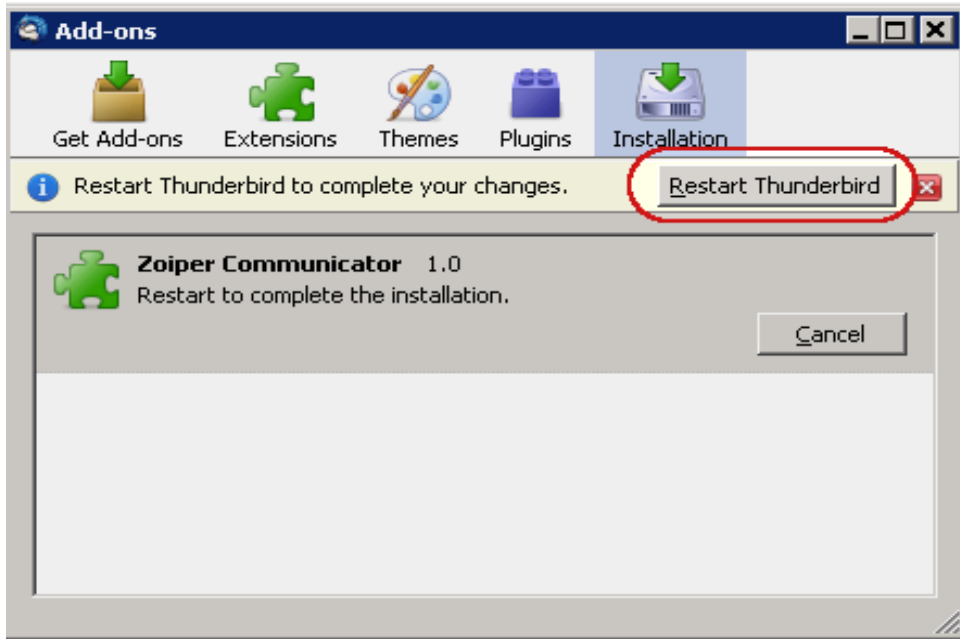

Browse to the directory where Zoiper Communicator Biz Is installed.

Select **ZoiperCommunicatorExtension.xpi**.

The next window will ask you to confirm the installation.

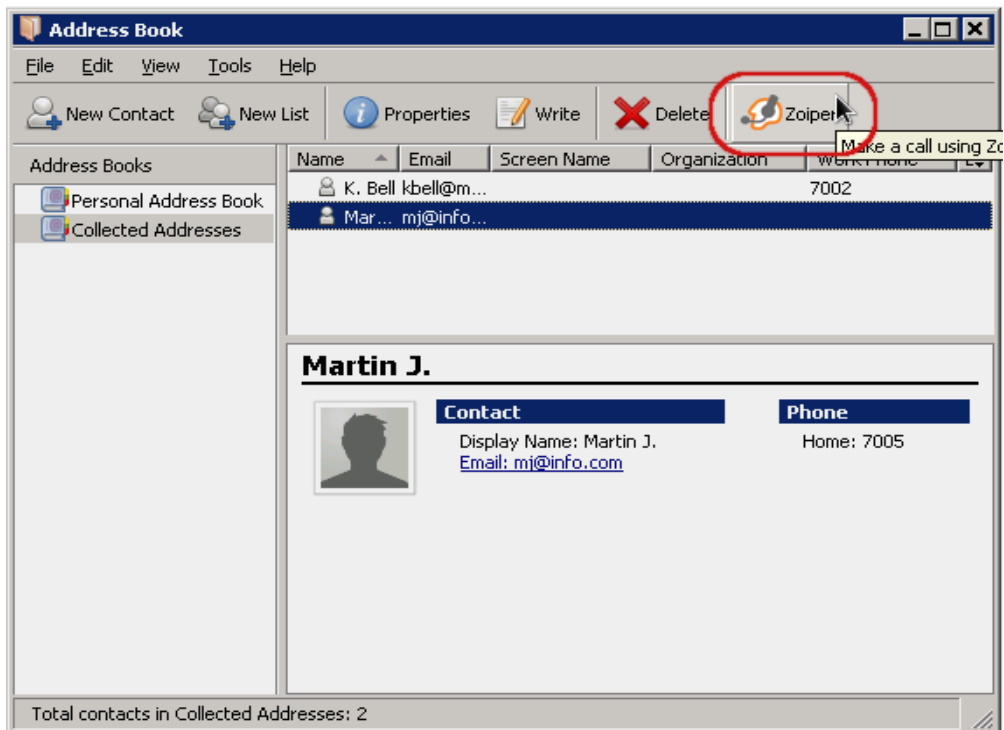

You will need to restart Thunderbird.

### How to use Zoiper Thunderbird add-on ?

When your mail client starts, open the  Address Book

You will see a new button named **Zoiper**.

Select a contact and press the **Zoiper** button.

Your softphone will be invoked and dial the number even if it was not running.

## How to configure Zoiper Thunderbird add-on ?

The add-on works for Zoiper Classic as well.

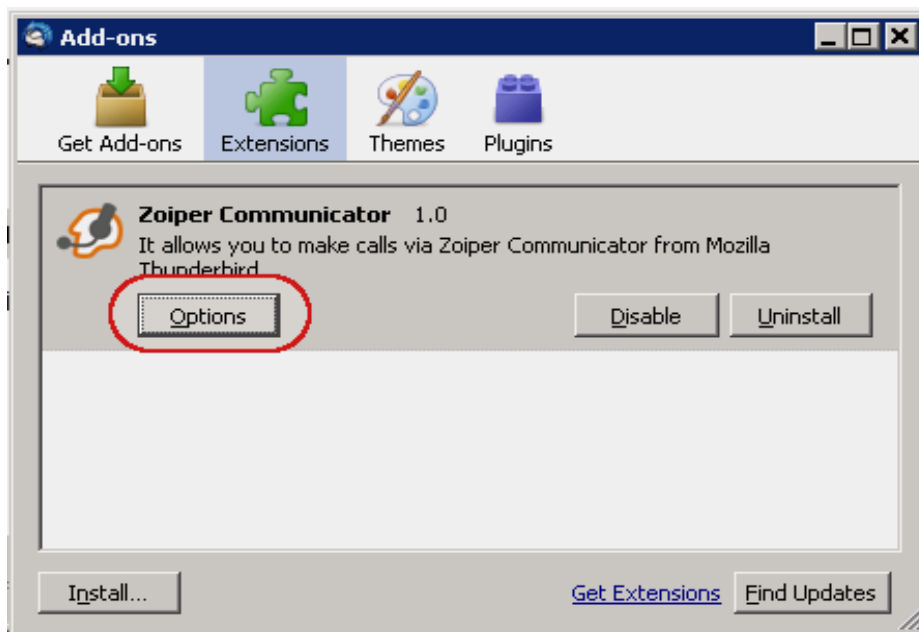

If you have both Zoiper Classic Biz and Zoiper Communicator Biz installed on the same computer, or there is a previous installation of **Zoiper**, the add-on will be associated with the newest installed version.

You will have to decide which version to associate the add-on with.

Go to the **main window** of the mail client.

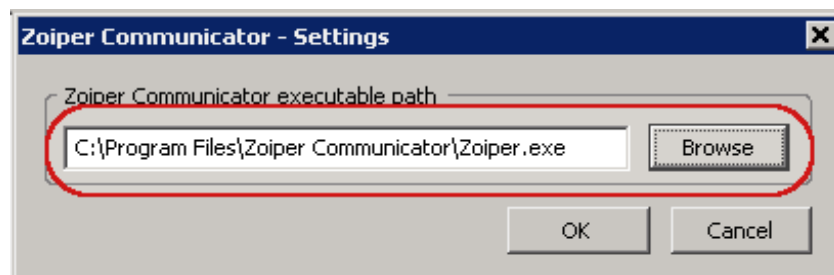

Then open the "**Tools**" menu and select "**Add-ons**".

Select the "**Zoiper**" add-on and open its "**Options**" window.

You will see a new window.

Use "**Browse**" to select the executable file of the desired application.

Press "**OK**" to confirm your choice.

Simply close the "**Add-ons**" window and start using your **Thunderbird** with Zoiper.
