

## Call Conference with Zoiper Classic

This guide shows how to create a call conference by using Zoiper Classic.

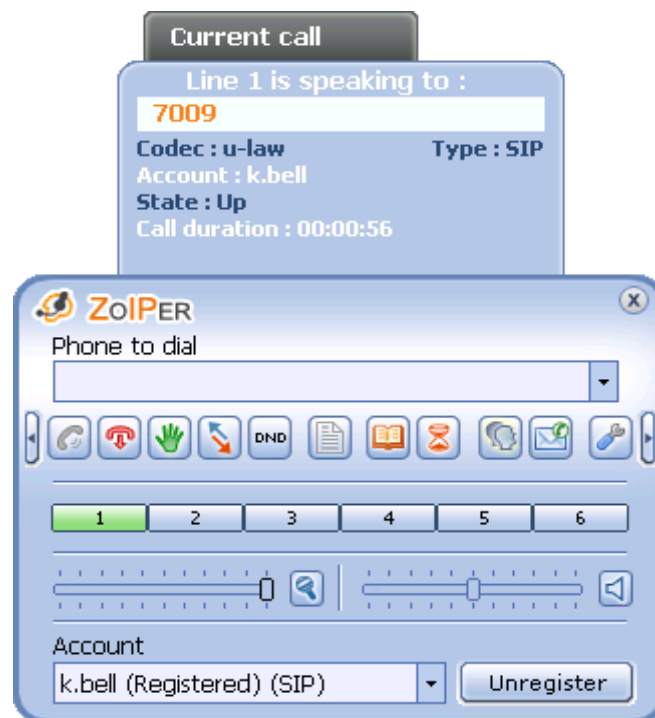

### What is a Conference Call?

A Conference Call is a call in which the Calling party wishes to have more than one Called party listening to the audio/taking part in the conversation.

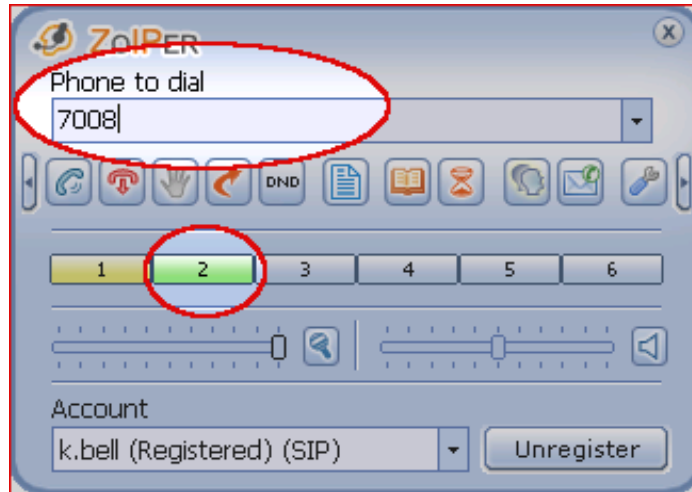

*Call Conference is a BIZ feature. You need to upgrade to Zoiper Biz to be able to use it.*

### How to create a Conference Call using Zoiper Classic?

Please run your Zoiper and call the first participant in the conference call.

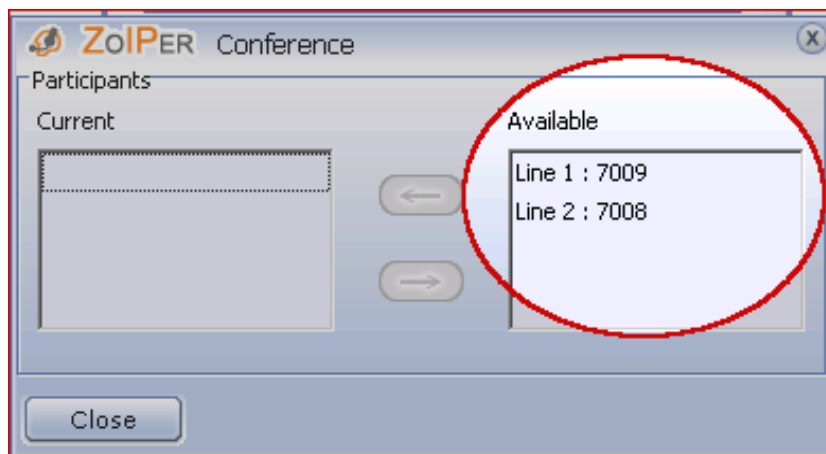

Now place the call on hold using the Hold button , or just select another line and enter the number of the second participant in the Call Conference. The first line will be automatically put on hold when you start dialing.

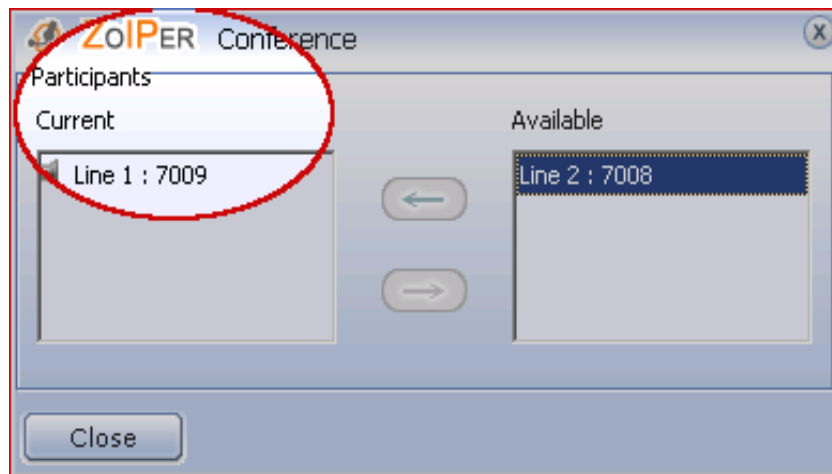

When the second participant answers the call please use the Conference button  to start the Call Conference.

First you will be asked to choose the participants for your Conference.

In the Available column you will see the ones that are available, but not added to the Conference yet.

Select a participant from the Available column and use the left arrow button  to add him/her to the Conference.

When all the participants are added to the Conference press Close to dismiss this window.

Now you have a call conference with two called parties.
