

## **Zoiper.com Launches the Zoiper Communicator Unified Communication Suite and an Active X version of the familiar Zoiper 2.0**

Zoiper Communicator features a new intuitive design for smooth VoIP, Video VoIP, FoIP and IM communication  
Zoiper 2.0 Active X allows calling straight from the browser

Belgium, 2009, April 13

The zoiper.com team launched the Zoiper Communicator multi-platform - IAX and SIP - Unified Communication suite for Windows and MAC OSX and are preparing versions for Linux and Solaris due for release in the very near future. At the same time – the Zoiper 2.0 Active X version is available for Windows and can be launched in Internet explorer and Mozilla browsers.

It is just about the right time for innovative solutions whose purpose by default is to save you time and money by seamlessly serving your constant communication needs. As such Internet communication is no longer limited to being a prerogative for highly technical environments.

The Zoiper Communicator is the result of years of development and research and its purpose is clearly to deliver all advantages of Internet communication: Voice, Video, Instant Messaging (IM) and Faxing through a single comprehensible and simplified communication solution.

Based on the voice engine of the familiar Zoiper 2.0 the powerful Zoiper software Communicator presents a completely redesigned interface and enhanced functionality for easy management of multiple communication sessions. With the dockable User Interface the Communicator makes chatting, calling and faxing easier than ever. Used as a standalone tool for free zoiper-to-zoiper communication and/or linked to a VoIP service provider or a PBX the Communicator is a complete solution for both home and office Internet communication environment.

The Zoiper communicator comes in two versions: feature-rich advanced business version (BIZ) and a version for basic Internet communication needs (Free) – both guaranteeing a smooth intuitive VoIP, VVoIP, FoIP and IM intercourse.

The new Zoiper Communicator interface features significant enhancement in order to make contact management easier than ever. An instant search engine greatly simplifies search and managing of Contacts, which is particularly useful with extensive Contact lists.

Integration with Outlook and Thunderbird (plug-in feature with the BIZ version) allow instant calling to your contacts through your favourite mail programs.

Together with the fax sending and receiving capabilities through Zoiper itself the BIZ version allows sending of faxes through any Windows application with the Zoiper fax printer driver.

The BIZ version of Zoiper ensures secure high-quality experience – echo cancellation, STUN, TCP, TLS with SRTP, DSCP; multiple codecs that could be set per account - including g.729.

A detailed look at the Zoiper functionality reveals key-features like: setting online presence, also known as online status, and personalizing with preset avatars or uploading pictures, native conferencing, call recording, autoanswer, hold, forwarding and transfer with settable preferences; improved user experience by automatic XML provisioning, URL handling,

command line dialing, custom ringtones and much more.

Zoiper Communicator supports multiple audio devices and in its Free version can be turned into a portable Communication tool uploaded on USB sticks, flashcards, etc.

Along with the Communicator the Zoiper team constantly keeps improving the familiar Zoiper 2.0 IAX and SIP softphone for Windows, Linux and MAC OS X delivering high-quality VoIP features, now also available in its Active X version for Windows.

You can freely download Zoiper Communicator Free and can obtain Zoiper Communicator BIZ for 60 euro for one license and going as low as 27 euro for high-volume purchases.

You can download Zoiper 2.0 Free version free of charge and get Zoiper 2.0 BIZ between 30 and 36 euro per single license and 10-16 euro for bulk orders. Zoiper 2.0 Active X version for Windows will cost you 500 euro per domain.
